

SHADE STRUCTURES

Product Information

Value Vinyls provides Monotec 370 Series commercial shadecloth to the shade sail and shade structure industry. Manufactured from strong HDPE round monofilament yarns and developed to perform as an “install and forget” shadecloth, Monotec 370 will retain its permanent shape and design to allow for consistent protection from the elements. These products are resistant to UV rays, with Monotec 370 being supported by the industry’s only 15 year UV warranty. This durable product also passes the most stringent Fire Retardant tests assuring it is safe to use on any structure. Engineered for strength, durability and performance in the harshest conditions, Monotec 370 is industry recognized as the strongest shadecloth available today.
